

ASHISH PARDHI

MuleSoft Technical Architect / Practice Manager | Salesforce AI + Integration Leader

Ashish.iitbcse@gmail.com - +91 8939520588

Professional Summary:

- MuleSoft Technical Architect and Practice Lead with 15 years of IT experience, including 12+ years in integration and 7.5+ years delivering enterprise MuleSoft 4.x programs.
- Executive-facing integration leader with deep expertise in API-led architecture, hybrid integration, platform governance, delivery enablement, and secure cloud connectivity.
- Trusted advisor across Salesforce, MuleSoft, AI, and automation initiatives, translating complex technology into scalable business outcomes.

Salesforce MuleSoft Architect / Manager:

- Lead enterprise integration strategy, solution architecture, delivery governance, and stakeholder alignment across MuleSoft and Salesforce programs.
- Design secure, reusable integration foundations spanning API-led connectivity, CI/CD, observability, security, and operational runbooks.
- Shape AI-enabled integration solutions using Agentforce, MCP, API Catalog, IDP, RAG, and LLM-driven automation patterns.

Salesforce/MuleSoft Technology:

- **MuleSoft Platform:** Anypoint Code Builder, MuleSoft 4.x, Anypoint Platform, Studio, CloudHub 1.0/2.0, Runtime Fabric, Omni Gateway, API Manager, Runtime Manager, Exchange, Design Center, MQ, CLI v4, UAPIM, API Governance, MCP Bridge, LLM Proxy/ AI Gateway, API Catalog, Topic Center.
- **Architecture & Integration:** API-led connectivity, REST/SOAP, RAML, OAS, EDA, AMQP 1.0, JMS, ActiveMQ, EDI X12, SAP, Workday, Oracle, Salesforce CRM, SFMC, SharePoint, AWS, MongoDB, SFTP, microservices.
- **AI, Agentforce & Automation:** Agentforce, Prompt Builder, MuleSoft for Agentforce, MCP, API Catalog, Topic Center, Mule AI Chain, AI agents, RAG, LLMs, prompt engineering, IDP, Einstein AI, Salesforce Flow, RPA.
- **Security & Platform:** OAuth 2.0, Basic Auth, SSO, Okta, connected apps, policies, custom policies, authN/authZ, VPC, VPN, DLB, private spaces, connectivity, tenant setup, access control.
- **DevOps & Delivery:** GitHub Actions, GitLab, Jenkins, Azure DevOps, Maven, CI/CD, release governance, deployment, monitoring, logging, error handling, testing, Agile, Jira, Confluence.
- **Languages & Tools:** Java, DataWeave 2.x, Python, Node.js, Postman, VS Code, GitHub Desktop

Certifications:

- Salesforce Certified Agentforce Specialist
- Salesforce Certified Hyperautomation Specialist
- Salesforce Certified MuleSoft Developer II
- Salesforce Certified MuleSoft Platform Architect I
- Salesforce Certified MuleSoft Integration Architect I
- MuleSoft Certified Delivery Champion
- Top contributor for MuleSoft Community
- MuleSoft Meetup Leader and Speaker

Key Projects Delivered:

AI-Powered Intelligent Customer Onboarding (Hushh.ai)

- Architected an AI-driven onboarding platform using MuleSoft MCP, Salesforce CRM, Supabase, OpenAI, and Gemini.
- Established a reusable multi-agent integration framework for real-time customer profiling and personalization.

Impact:

- Reduced onboarding effort and enabled AI-enriched customer engagement from the first interaction.

MuleSoft IDP & Einstein AI Implementation (AIE Solutions)

- Led MuleSoft IDP and Einstein AI implementation for intelligent document processing and retention governance.
- Integrated Salesforce, email, and SharePoint to automate metadata extraction, classification, and policy-based retention.

Impact:

- Improved compliance automation and reduced manual document governance effort across 20+ email accounts.

Salesforce & Opera PMS Integration – Leela Hotels

- Architected Salesforce–Opera PMS integration for guest profile, room availability, reservation, revenue, and inventory synchronization.
- Established API-led connectivity and reconciliation patterns to improve operational data consistency.

Impact:

- Improved inventory visibility, revenue forecasting, and operational source-of-truth alignment.

SAP S/4HANA – Salesforce Global Integration (Diageo)

- Led MuleSoft architecture for SAP S/4HANA RISE and Salesforce integration across 130+ countries.
- Designed a custom SAP EM connector using AMQP 1.0 and OAuth 2.0 to support secure global data synchronization.

Impact:

- Enabled real-time global order tracking and strengthened enterprise integration security.

Leadership & Practice Contributions

- Defined API-led architecture standards and reusable MuleSoft assets across Salesforce, SAP, hospitality, IDP, and AI-led programs.
- Led discovery, estimation, governance, and executive architecture discussions across complex multi-team delivery programs.
- Mentored architects, technical leads, and developers while shaping next-generation MuleSoft practice growth around AI and integration.
